

The Intrepid Explorers are on an exchange program in Greece, and today they visited a museum. Divers have recovered treasures from a shipwreck at the bottom of the Aegean Sea and brought them back to the museum.

Your mission: Use the clues below to work out which object each clue describes. Then find where it belongs in the table and draw it in the correct box.
 All the objects you need to find are shown at the bottom of the page to help you.

OBJECT #1
 Greek people used this object to store oil and wine while sailing. Find the box where the fishing net row and sailing boat column meet to find the object.

OBJECT #2
 This object is used to allow people to look at themselves. Find the box where the rope knot row and sailing hat column meet to find the object.

OBJECT #5
 People wear this object on their fingers. Find the box where the lighthouse row meets the ship's wheel column.

OBJECT #3
 People make music with this object. Find the box where the anchor row and oar column meet.

OBJECT #4
 This object allows people to pay for things. Find the box where the fishing net row meets the ship's wheel column.

OBJECT #5
 This object is a sculpture representing important people or gods from ancient Greece. Find the box where the rope knot row meets the sailing ship column.

The Olympian gods

Archie

History
8+

During their visit to the museum, the Intrepid Explorers discovered the gods and goddesses of ancient Greece.

Your mission: Draw a line to match each god or goddess to the correct description.

To help you, you'll find the names and descriptions of the gods in the Greek mini-lesson.

Artemis

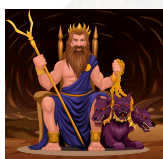

Goddess of war, agriculture, wisdom and various household crafts.

Athena

God of the sea, rivers, floods and drought, earthquakes, and horses.

Hades

God of the sun, music, and healing.

Poseidon

God of the sky, thunder, lightning, and weather.

Zeus

Goddess of the hunt, the wilderness, wild animals, childbirth.

Apollo

God of the underworld, the dead, and hidden riches.

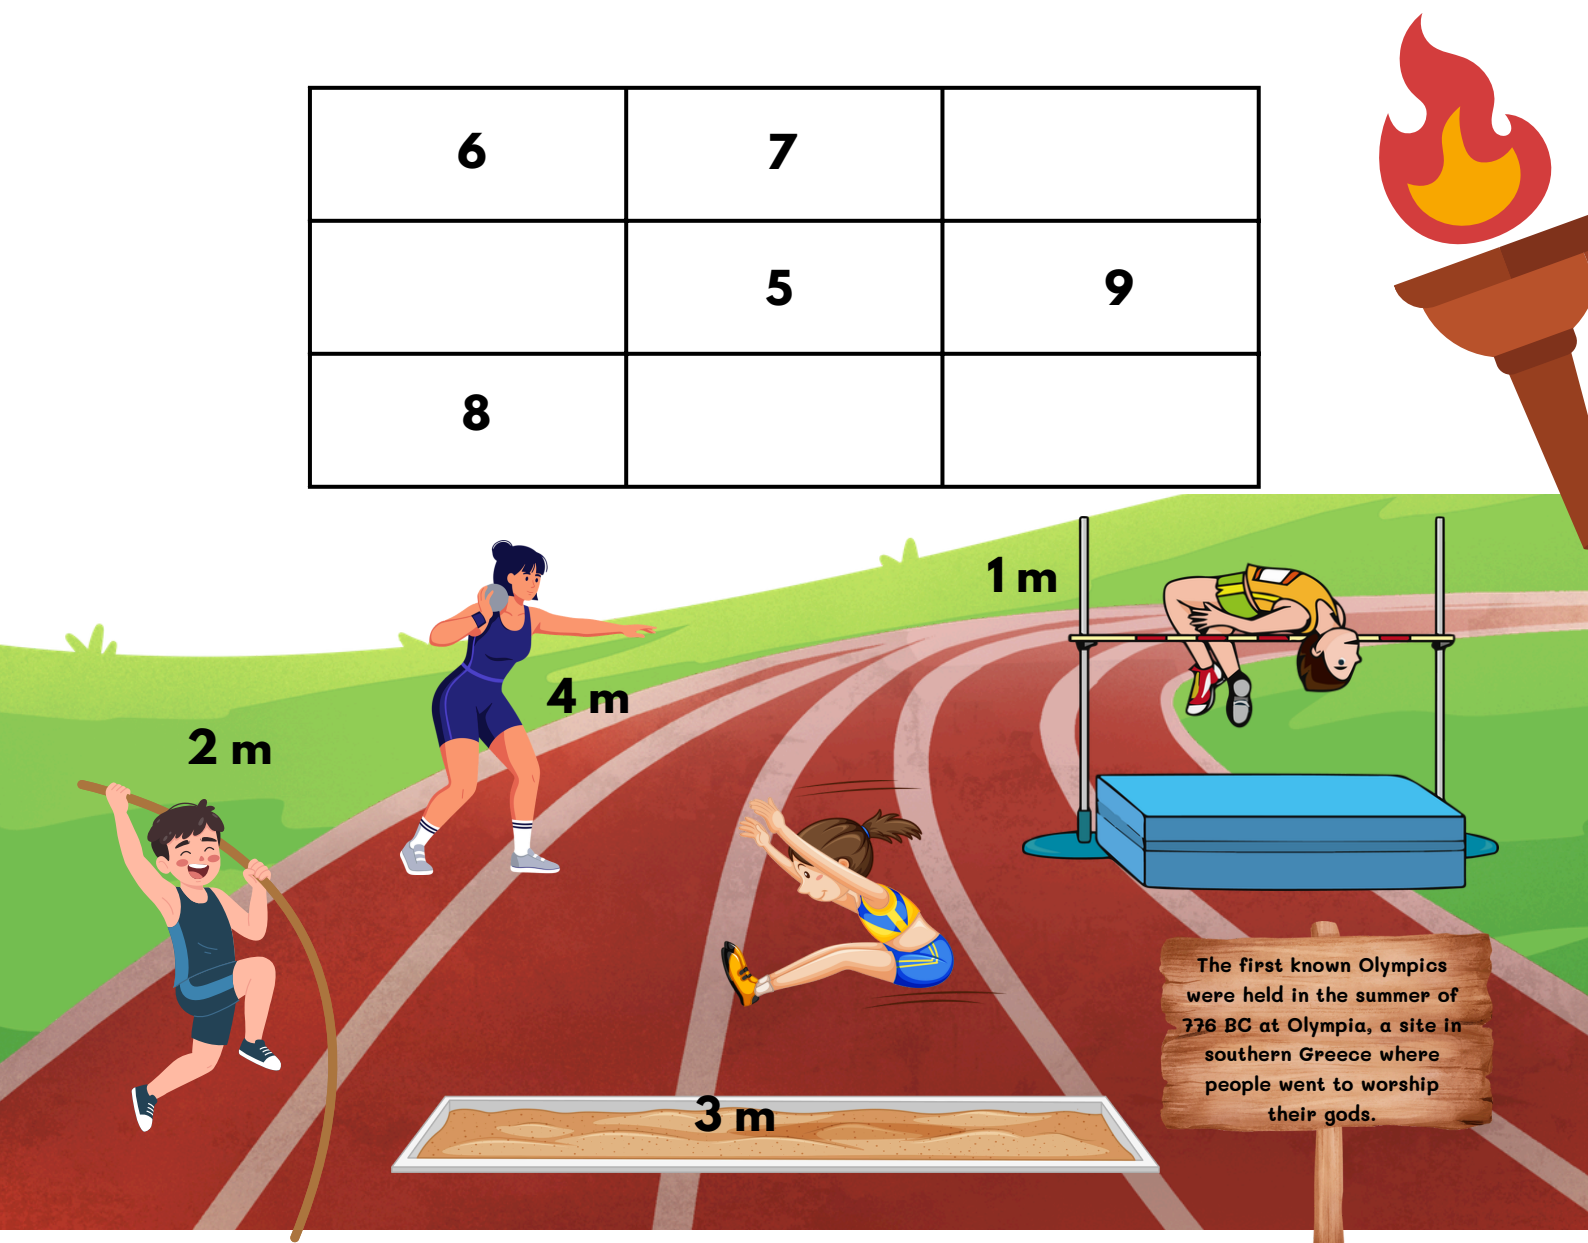

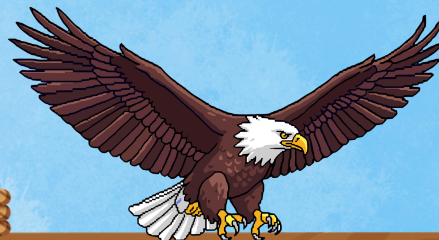

The Intrepid Explorers are competing in an athletics challenge with the Greek students they're staying with. Their class has won 15 medals, and the Explorers earned 4 of them with these scores:

- Shot put: 4 metres
- High jump: 1 metre
- Long jump: 3 metres
- Pole vault: 2 metres

Your mission: Place these four scores in the magic square so every row, column and diagonal adds up to 15.

Count with the animals

Archie

Maths
8+

Each animal below represents a different number. Use the first calculation to figure out what each animal stands for. As you work through the problems, write your answers in the table at the bottom of the page.

$$\text{goat} + \text{goat} + \text{goat} = 3$$

$$\text{goat} - \text{goat} = \text{goat} + \text{goat}$$

$$\text{goat} + \text{goat} = \text{snake}$$

$$\text{snake} - \text{goat} = \text{tiger}$$

$$\text{tiger} - \text{goat} = \text{eagle}$$

$$\text{eagle} \times \text{eagle} = \text{bear}$$

$$\text{goat} \times \text{goat} = \text{frog} + \text{eagle}$$

$$\text{bear} \times \text{eagle} = \text{butterfly} - \text{goat}$$

$$\text{---} + \text{---} + \text{---} = 3$$

$$\text{---} - \text{---} = \text{---} + \text{---}$$

$$\text{---} + \text{---} = \text{---}$$

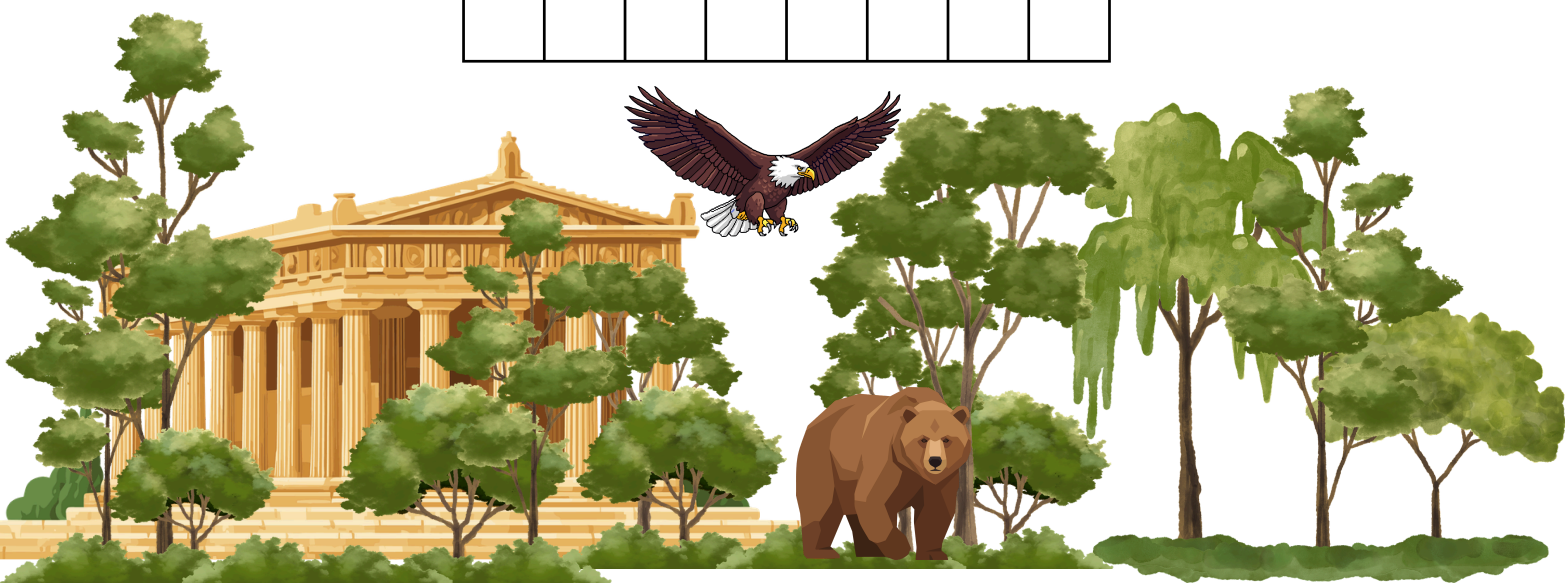

$$\text{---} - \text{---} = \text{---}$$

$$\text{---} - \text{---} = \text{---}$$

$$\text{---} \times \text{---} = \text{---}$$

$$\text{---} \times \text{---} = \text{---} + \text{---}$$

$$\text{---} \times \text{---} = \text{---} - \text{---}$$
